Svetlana Electron Devices, Inc. is dedicated to serving the radio amateur. Our organization is staffed with radio amateurs at all levels. We know the contribution amateur radio has made to power tube technology and we strive to strengthen our association with the radio fraternity. We understand the needs and special requirements of hams and are tailoring our products and organization to serve those needs.

Svetlana power tubes are new to the Western world, however, we have been manufacturing power tubes in St. Petersburg Russia since the beginning of the technology. Svetlana began manufacturing electric light bulbs over one hundred years ago and is among the earliest vacuum tube manufacturers. With a rich history in the technology, Svetlana is the largest power tube designer and manufacturer in the world. We manufacture a wide variety of power tubes up to the level of 1 Megawatt CW. Svetlana tubes are of the highest quality backed by the strongest warranty in the industry.

Listed below are the essential characteristics of Svetlana power tubes now available for amateur radio requirements.

Svetlana Power Tubes for Amateur Radio														
Tube Type	Max	Max	Max	Max	Freq.	Heater	Heater	Svetlana	Svetlana	Typical Operation				
	Plate Dissipation W	Plate Voltage	Plate Current mA	Screen Voltage	For Full Rating	Volts	Amps	Socket	Anode Connector	Plate V	Grid 1 V	Grid 2 V	Plate Current mA	Power Output W
