

## " Radioamator.ro - 10 years anniversary "

### Award rules

On July 2014 we celebrate 10 years since the Romanian web site Radioamator.ro has launched. During 10 days, between July 24 and August 3, a special call sign YR10RRO will be active. Those radio amateurs contacting this station and accumulating a certain number of points will be eligible to claim a special award: "Radioamator.ro - 10 years anniversary". The points can be earned by contacting certain stations between July 24 and August 3. Those stations should be operated by hams who contributed or helped the web site Radioamator.ro.

The award is issued in three classes (I, II and III) and two traffic modes (CW and SSB). The applicants should earn a minimum number of points from QSOs in HF bands (from 160 to 10 meters) made with the special call sign YR10RRO and a few other stations operated by hams that contributed with articles published by radioamator.ro or helped managing the web site during last 10 years. The list of the call signs can be found at this address: <http://www.radioamator.ro/yr10rro/?l=en> Those who confirmed their presence on HF bands between July 24 and August 3, 2014 are highlighted with red.

The total number of points required for each class is as follows:

Class I: 100 points

Class II: 75 points

Class III: 50 points

The award is issued separately for each traffic mode.

A QSO made with a station present on the list on any band is worth 5 points. On the same mode, on any other band a contact with the same station does not offer any more points. In other words, a station listed on the Radioamator.ro's contributors list could give no more than 5 points in CW and 5 points in SSB, on any HF band.

A QSO made with the special call sign YR10RRO is worth 10 points on any band and mode, but a new contact on the same mode and a different band would offer additional 10 points.

To be eligible for the award, for any class, the applicant must work YR10RRO at least once.

The award is free and is offered in electronic format for contacts made between July 24 and August 3, 2014. The application should be submitted by email to [yr10rro@radioamator.ro](mailto:yr10rro@radioamator.ro). The following information is expected for each eligible contact:

- Data and time (UTC)
- Band (exact frequency, if possible)
- Traffic mode (CW or SSB)
- RS(T)
- Call sign
- Points claimed

The calculated claimed total number of points is also expected in the application. Please provide your call sign, name and email address where you want to be contacted.

Due date to apply for "Radioamator.ro - 10 years anniversary" award is December 31, 2014.
